“C-Deck” Composite Deck Screws

The Ultimate Composite Deck Screw

C-Deck Composite Deck Screws are specially designed to eliminate the “mush-rooming” and blemishes that can occur on composite materials. They are also an excellent choice for wood decks, where the top threads work to pull down and hold warped lumber and lock the boards together. A multipurpose fastener which meets the challenge regardless of the material used. For interior or exterior use with wood, composite, and other plastic materials.

C-Deck Screws

Corrosion-resistant dual thread screw for composite and wood decks

ACQ Compatible

Five Colors

- Triple Ceramic Coating
- Corrosion Resistant
- Compatible with ACQ materials

“Mini” C-Deck Screws

For thinner composite materials like fencing & railings

ACQ Compatible

“C-Deck” Composite Deck Screws

Dual-Threads

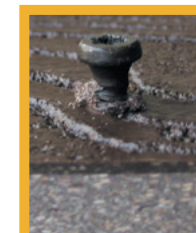

1 Reverse Top Thread

Grabs excess material and pulls it down into the hole, then locks the boards together

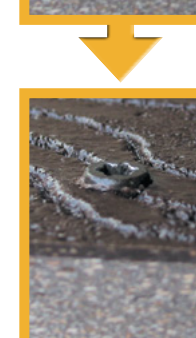

2 Driving Thread

Sharp & coarse bottom threads cut cleanly & easily with maximum holding power

Triple Ceramic Coating

- 1200-hour corrosion resistance in both ACQ and salt spray conditions
- Outstanding abrasion resistance

Eliminates "Mushrooming!"

In composite materials, the C-Deck's special design helps it to pull excess material into the hole while counter-sinking

Star Drive Recess

- Twice the torque of Phillips & square drives
- Reduces camout and end load
- Gives better bit life
- Reduces spinning & fastener damage

75 & 350-ct. Jars (C-Deck)

250-ct. Jars (Mini C-Deck)
