Construction Lag Screws

Corrosion-Resistant
Round Washer Head Screws

The Superior Alternative to the Common Lag Screw
Heat treated & hardened, these screws are stronger & more durable than ordinary lag screws. They have deep cutting threads for quick, easy driving & a sharp notched point for exact, quick starting with less "walking". A built-on round washer head with smooth edges gives a professional finish.

	#14	#15	#17
Thread diameter:	.25	.265	.310
Head diameter:	.54	5/8"	11/16"
Shank diameter:	.167	.205	.226
Recess size:	T-25	T-30	T-40

"CTX" Construction Lag Screws

Built-On Round Washer Head
• Smooth edges give a neat, finished appearance

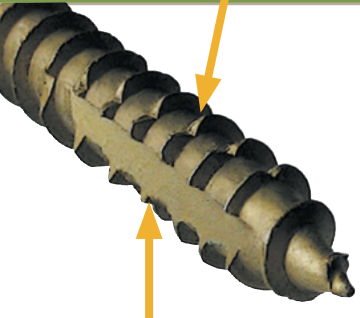

Star Drive Recess
• Twice the torque of Phillips & square drives
• Reduces camout and end load
• Gives better bit life
• Reduces spinning & fastener damage

Knurled Shank
• Reams hole in board being fastened, reducing drag on shank and driving tool
• Makes screw easier & less tiring to drive

Spiral Notches on Threads
• Cut through fibrous materials and greatly reduce the torque needed to drive the screw without affecting holding power

Type 17 Notched Point
• Starts quickly without "walking"
• Reduces splitting & drive torque requirements by removing wood from the hole as the screw penetrates instead of forcing the wood apart
